 **PROFI MULTICUT**

The drilling experts - for generations

We are the only complete supplier of drilling tools from our own production in Europe and the leading manufacturer of metal, stone and wood drills. As an Austrian family business, high quality has been our standard for over 60 years.

Whatever you need:

We supply the right drill bit to achieve optimum results even more efficiently, precisely and and faster to achieve optimum results. In short:

We ensure the perfect work result.

A tool that masters every challenge.

Anyone who works with different materials on a daily basis knows the challenge: constant changing of drill bits, adjustments to the material and unnecessary delays. This is exactly where the PROFI MULTICUT comes in.

Whether on the construction site, in the workshop or at home - the PROFI MULTICUT ensures continuous performance without interruption. No stopping, no changing - just pure power for countless materials.

USE INSTEAD OF CHANGING.

A drill for every challenge.

// Constantly changing drill bits between different jobs and materials is a thing of the past. The PROFI MULTICUT drills effortlessly through tiles, masonry, metal, wood and plastic - without interruption, without compromise.

Thanks to its extra-sharp cutting edges and special design, it ensures clean drill holes in all materials.

Whether for assembly work on the building site or DIY

projects at home, this drill offers maximum control and reliability in any material - without the hassle of changing drill bits!

This makes the PROFI MULTICUT the first choice for anyone who values quality and versatility.

A drill for every challenge - versatile, efficient and precise. That is the PROFI MULTICUT.

Extra sharp cutting edges

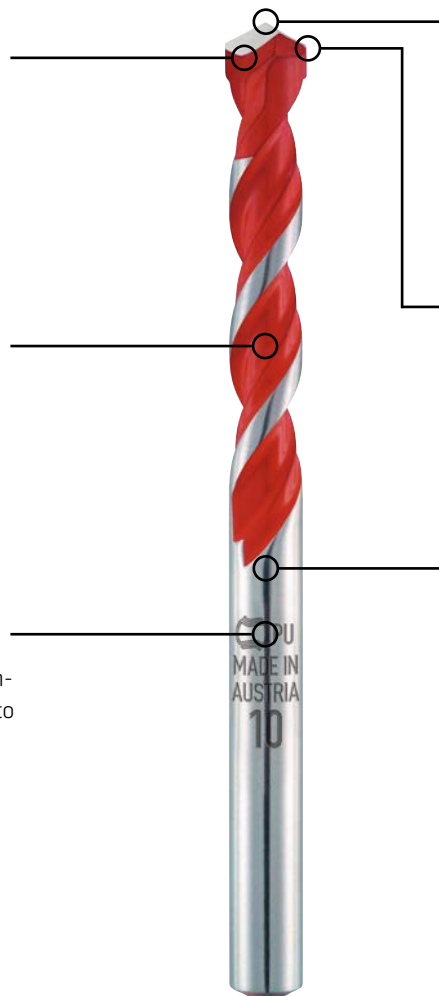

Diamond-ground cutting edges ensure precise drilling, even in hard materials.

No clogging

The patented 4-fold step profile guarantees fast removal of the drilling dust and therefore no clogging during the drilling process.

Certified

With the PGM test mark, we guarantee the best anchor hold according to the highest quality standards.

No slipping

Thanks to the special roof and face grinding, the drill bit centres perfectly even on smooth or convex surfaces.

Durable

The bevel grinding maximises the service life of the drill bit.

Universally applicable

Whether cordless, impact or hammer drill, there is a suitable shank type for every shank types.

PROFI MULTICUT

Field of application:

High flexibility and precise drilling - even when drilling alternately in different materials. For rotary drilling in tiles, masonry, metal, wood and plastic.

// Diamond-ground carbide cutting edges

// Patented 4-fold step profile

// Long service life for long-lasting performance

Universal special drill

For metal, masonry, tiles, wood and plastic

Diamond-ground, sharp cutting edges

VERSATILE FOR EVERY APPLICATION & EVERY MATERIAL.

Different materials usually require different tools - but not with the PROFI MULTICUT. A true all-rounder, it drills effortlessly through tiles, masonry, metal, wood and plastic without the need to change tools. Whether on the building site, in the workshop or in the DIY sector - this drill ensures precise, clean drill holes in any material.

BUILDING & CRAFT

// DRYWALL CONSTRUCTION & INTERIOR FITTINGS

For precise and clean drilling in plasterboard, OSB and chipboard without damaging the material.

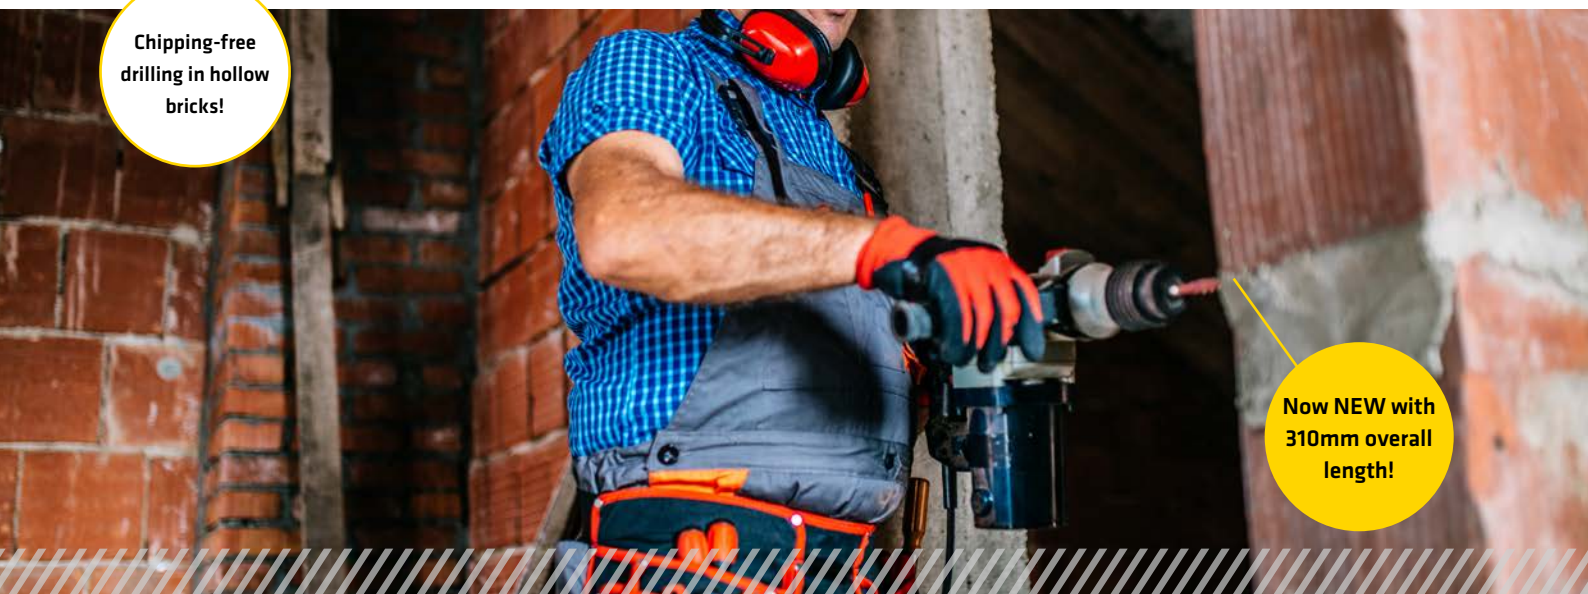

// ELECTRICAL INSTALLATIONS

The PROFI MULTICUT enables precise cable feed-throughs in masonry, drywall and hollow bricks, without chipping the material and with a clean drill hole for easy installation.

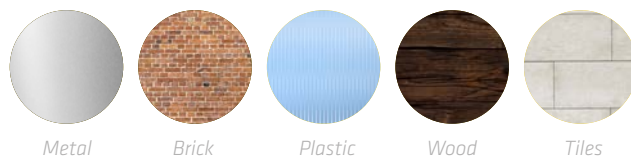

// ASSEMBLY WORK/FASTENINGS ON FAÇADES & BALCONIES

Ensures secure fastening of shelves, railings and brackets to walls with different materials. Whether bricks, metal beams or dowel fixings, it enables precise drilling and stable attachment - also perfect for suspended furniture.

Chipping-free
drilling in hollow
bricks!

Now NEW with
310mm overall
length!

// DRILLING WORK IN WINDOW AND DOOR CONSTRUCTION

A 6.5 mm drill diameter is ideal for the precise fastening of door frames with hanger bolts - the PROFI MULTICUT effortlessly penetrates combined materials such as plastic, metal frames, wood and masonry and ensures a secure hold.

The chambers of hollow bricks in particular tend to break out during drilling. The special geometry of the PROFI MULTICUT prevents precisely this and makes it the ideal choice for assembly and installation work on the construction site.

INDUSTRY & TRADE

// SHOP & EXHIBITION STAND CONSTRUCTION/ASSEMBLY

Fast and precise drilling in various materials make the PROFI MULTICUT the ideal choice for efficient assembly and dismantling in shopfitting and exhibition stand construction.

Whether in brick, sand-lime brick or concrete - the patented 4-stage profile enables fast drilling dust feed and prevents blockages. Thanks to its versatility, the PROFI MULTICUT drills effortlessly through a wide variety of materials. Whether PVC-U or wood/aluminium windows - you can drill precisely through the masonry in just one work step. Perfect for installing windows and doors!

Profi Multicut
in 6.5 mm
ideally suited!

A VERSATILE SOLUTION FOR EVERY DRILLING CHALLENGE.

Drilling in tiles requires precision and control. Thanks to the special bevelled geometry, the PROFI MULTICUT does not slip and enables clean, tear-free drill holes - without any cooling. Perfect for ceramic, soft tiles and the masonry below. Drilling through tiles and bricks is no problem, so nothing stands in the way of the plug.

HOME IMPROVEMENT & DIY PROJECTS

// TILE DRILLING IN THE BATHROOM & KITCHEN

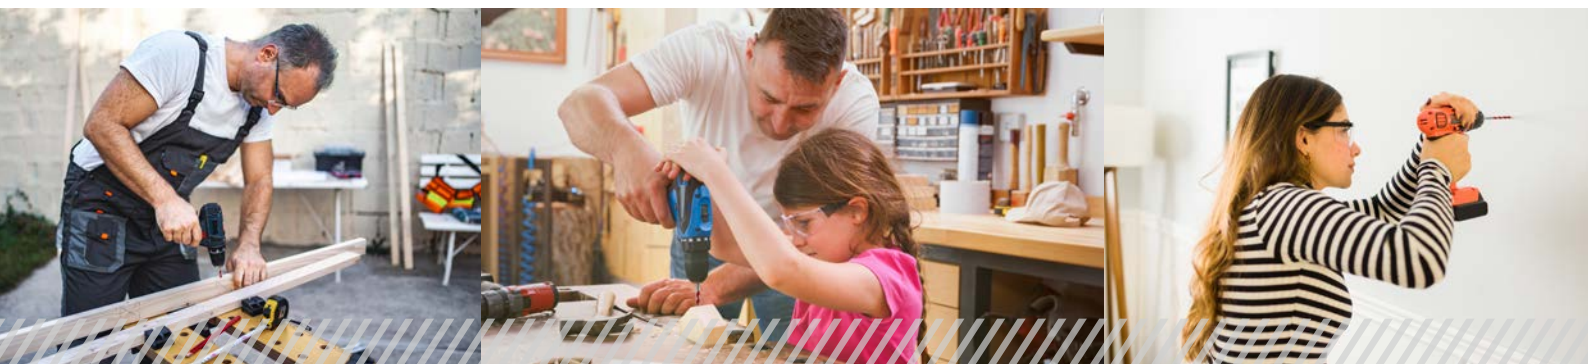

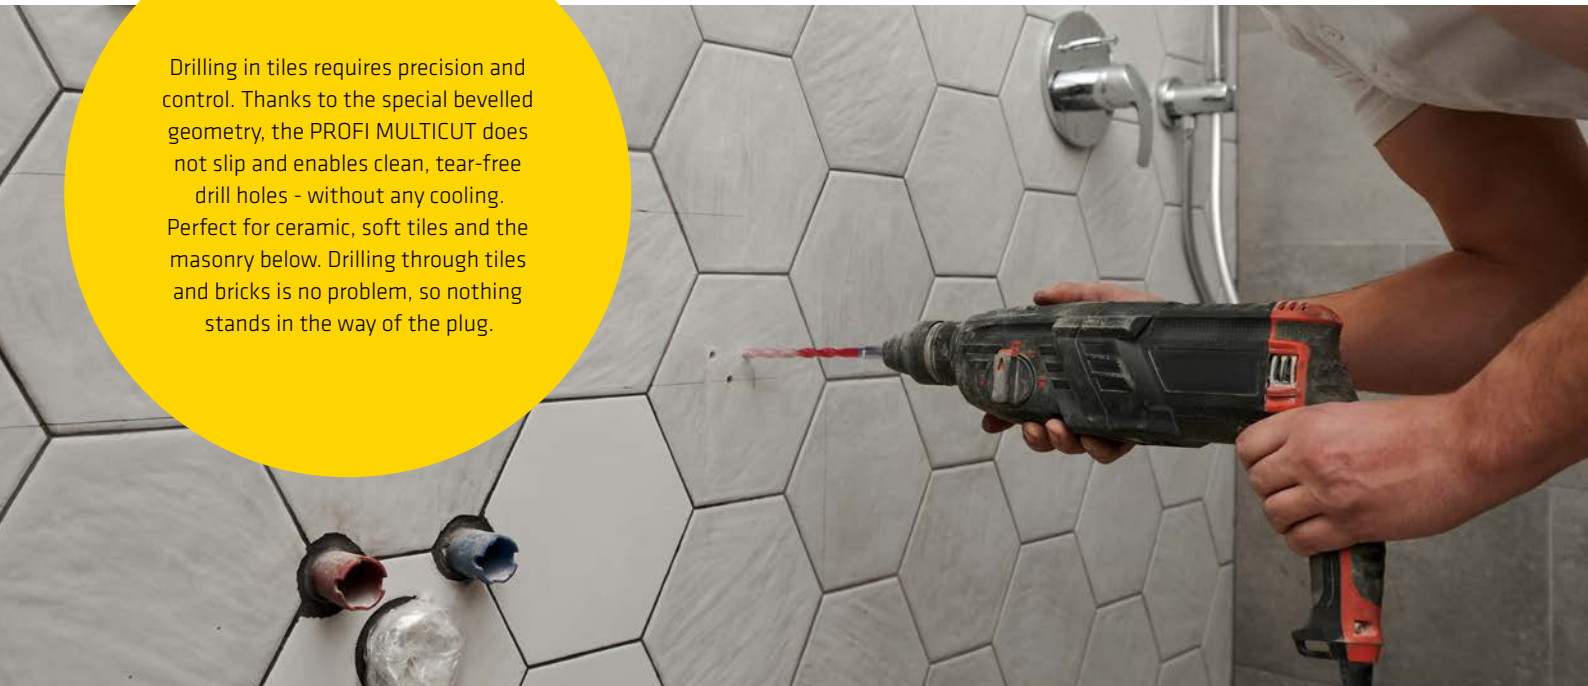

Soft tiles can be drilled through precisely - perfect for the secure installation of tea towel holders, towel rails or door stoppers without damage or slipping.

// FURNITURE MOUNTING

Precise attachment of hanging furniture and secure connections to the masonry, such as door frames or panelling, are achieved reliably and cleanly.

// ATTACHING DECORATIONS & WALL SHELVES

Hollow bricks, tiles and plasterboard can be drilled through effortlessly - ideal for the stable attachment of photos, paintings, decorations and more.

Metal drilling places high demands on the tool. The diamond-ground cutting edges of the PROFI MULTICUT enable effort-less penetration into metals such as aluminium, copper and sheet steel - without heat build-up and with clean chip removal.

The PROFI MULTICUT is particularly suitable for installation work on roofs, as there is a substructure made of wood or other materials behind every roof cladding. As it can drill metal as well as wood, the number of tools required is reduced and there is no need for tedious re-clamping.

OUTDOOR & SPECIAL APPLICATIONS

// INSTALLATION OF SOLAR SYSTEMS

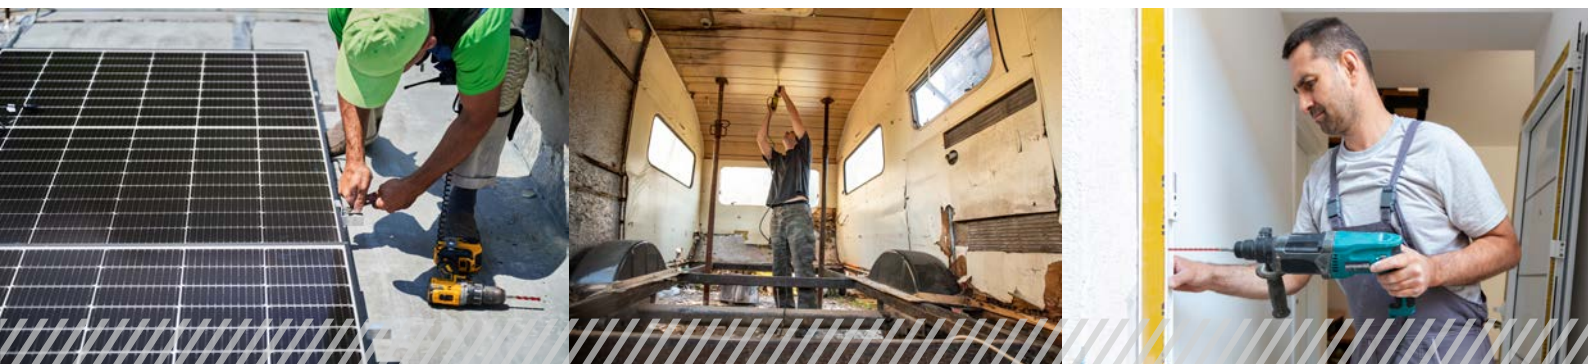

The PROFI MULTICUT is the smart choice for reliable drilling in roof tiles, metal substructures and wooden constructions.

// CAMPING & VEHICLE CONVERSIONS

Drilling work in motorhomes, trailers and plastic panelling can be carried out precisely and reliably. The drill also shows what it can do in body parts and interior materials.

...and these are just some of the many possible applications of the PROFI MULTICUT.

THE THREE FOR ALL CASES.

The PROFI MULTICUT is available in three different shank versions to ensure optimum compatibility with different drills and applications. Whether for cordless screwdrivers, classic drills or powerful rotary hammers - the PROFI MULTICUT offers maximum flexibility.

Cylindrical shaft

Ideal for all standard drill chucks in commercially available drills.

1/4" hexagonal shank

Fits in every standard cordless screwdriver and universal bit holder thanks to its standardised shank profile, enables quick repositioning and offers a secure hold - even in conventional drill chucks without slipping.

SDS-plus shank

So that the PROFI MULTICUT can also demonstrate its maximum performance in SDS-plus rotary hammers, this shank was developed with an automatic impact stop function. This means you can drill without worrying, as the ground carbide insert will not be damaged.

With these three shaft variants, the PROFI MULTICUT is equipped for every challenge - maximum performance, perfect fit and maximum efficiency in every situation.

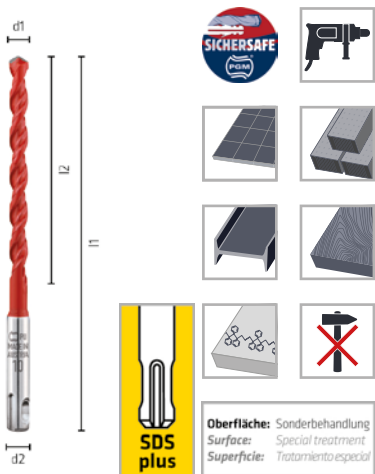

ONE DRILL HAS COUNTLESS POSSIBILITIES.

When every drill hole fits - without changing tools.
